Video Clip Captures Power of Sea Ice

I received this link to a video clip from our friend Darcy Dugan at the Alaska Ocean Observing System (AOOS). This is a three minute 26 second long video on Youtube from Oooguruk Island taken on June 23, 2009. It shows the ice pack over-riding this drill island in the Beaufort Sea. Make sure you have your sound working. It is incredible! [>view clip](#).

UAF Researcher Engages Communities and Students in Permafrost Research - The Anchorage Daily News published this Ned Rozell piece on Sunday, about UAF scientist Dr. Kenji Yoshikawa, who is known to many of us for his excellent community based permafrost research and his talent for engaging local students in the world of climate science [> full story](#).

[Dr. Yoshikawa](#) has also developed a series of terrific action comic books, aimed at educating students about permafrost and community based monitoring. Here is the Tunnelman [comic web page](#). Fun reading for kids and adults as well.

If you have an observation, photo, video, or an update you would like to include in our E-News or have added to our [Alaska Climate Events Map](#), you can e-mail me at mbrubaker@anthc.org

Regards - Mike
